Generation XV Managed Business Center

As guests become more reliant on using hotel's business centers in greater number during their visits, hotels have to find ways to keep up with service demand and ensure a high-quality user experience and Security. ADVHTECH is the leader in providing such solutions to hospitality industry, yet we take the pride to introduce the Generation XV - Managed Business Center, an ideal solution that will redefine the standards and concepts of public access terminals.

NOW EASIER
than ever

With the solution relying on modern equipment in a secure and reliable environment, Generation XV looks to cater the needs of guests with a wide range.

So if a guest at the hotel wants to work on an MS Office document, or print their boarding pass, take a quick glance at the weather, or find the closest restaurant, Generation XV Managed Business Center makes all this available with much ease right at the Business Center.

FEATURES AT GLANCE

Modern equipment

Secured environment

Multi-lingual

Microsoft Office

Local Restaurants

Printing options

SECURITY

This solution is purely designed to cater the audience from every walk of life, despite providing this much accessibility, Generation XV - Managed Business Center ensures it does not compromise on security, or privacy of the end-user and guest. This solution not only discourages and wards off cyber attacks and intruders, it prioritizes the privacy of the guest by ensuring all data entered and history of the actions of the end user is wiped out when the guest ends the session.
